

MOATAZ AHMED MOHAMED MANSOUR

Android Developer

mezomansour57@gmail.com | +20 127 837 6071 | [LinkedIn](#) | [Github](#) | [Portfolio](#)

EDUCATION

B.Sc. Computer Science

Pharoas Academy | 2022 - 2026

TECHNICAL SKILLS

Languages: Kotlin, Java

Android: Jetpack Compose, Android SDK, Material 3, XML, SQLite

Architecture: MVVM, MVI, Clean Architecture, Multi-Module, Coroutines, Flows

Testing: Android Unit Testing, UI Testing

Tools: Android Studio, Git, Docker, Firebase, Hilt (DI)

Platforms: GitHub, Vercel, Linux

PROJECTS

• **Android Bubbles** — Real-time chat interface using Android Bubbles API with Direct Reply support, typing indicators, and live chat simulations.

Tech: Kotlin, Jetpack Compose, Material 3, Clean Architecture, Coroutines

✓ Implemented bubble notifications for floating chat heads with real-time message delivery.

• **Android Biometric** — Biometric authentication integration for securing sensitive operations and protecting stored data.

Tech: Kotlin, Android Biometric API, Keystore System, Jetpack Compose

✓ Fingerprint and face authentication with encrypted key management for secure data storage.

• **Packager** — Minimal utility app to instantly launch any installed application by package name.

Tech: Kotlin, Android SDK, Launcher Shortcuts, Single-file Implementation

✓ Auto-launch feature, launcher shortcuts, and streamlined single-file Kotlin architecture.

• **Simple Quotes** — Daily curated quotes app with smooth animations and favorites management.

Tech: Kotlin, Jetpack Compose, MVVM, Room Database, Material 3

✓ Favorites system with Room database, animated quote transitions, and clean UI.

• **Islami** — Islamic application providing daily Azkar, Quran reader, and prayer times.

Tech: Kotlin, Android SDK, SQLite, Jetpack Compose, Material Design

✓ Quran reader, daily Azkar tracker, and prayer times with modern Android stack.

EXPERIENCE

Android Developer | 2023 - Present

Personal & Open Source Projects

- Developed 10+ Android applications using Kotlin and Jetpack Compose with modern architecture patterns.
- Implemented Clean Architecture with MVVM/MVI patterns for scalable, testable codebases.
- Built custom UI components, animations, and Material 3 design systems for enhanced UX.
- Integrated Firebase services, biometric authentication, and third-party API integrations.
- Published open-source projects on GitHub.

CERTIFICATIONS & TRAINING

• **Android Development Diploma** | Route Academy | 2024

• **Android Basics with Compose** | Google | 2023

LANGUAGES

Arabic (Native) | **English** (Professional Working Proficiency)
